

LE VOLCAN

BY

Elite Tour Réunion

*Mesmerizing and breathtaking,
the Piton de la Fournaise is a
geological richness of
Reunion island.*

*This fantastic panorama, carries
the imagination to the liking of
the changes of scenery of this
theatre in the outdoors!*

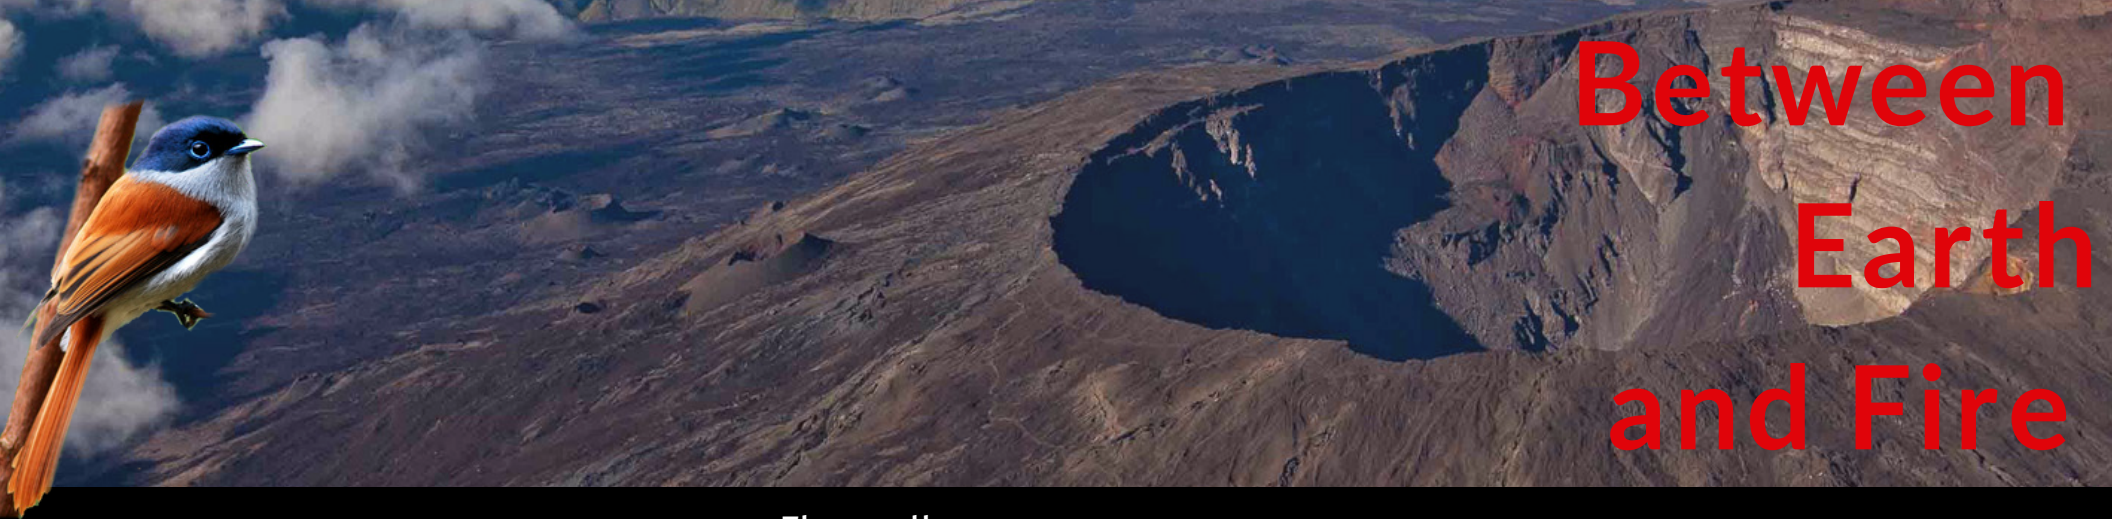

The Piton de la Fournaise, appeared about 500 000 years ago, is one of the most active volcanoes in the world with about a rash every 9 months!

Reunion island is entirely formed by the geological activity of the "Hot spot" of the island, which started about 3 million years ago. Before forming the massif of the Piton de la Fournaise, this volcanism first formed the massif of the Piton des neiges.

The Massif of the Piton de la Fournaise has built on the eastern flank of this ancient volcano in the last 500,000 years.

To visit the Piton de la Fournaise is to witness the majesty of our Earth!

Between Earth and Fire

Your day begins with the panorama of the Nez de Boeuf to discover the Rivière des Remparts and its valley.

Then you will discover the crater Commerson, volcanic chasm, inevitable step on the road of the volcano.

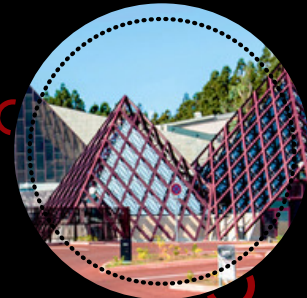

The small village of Bois Court will seduce you with its stunning viewpoint on Grand-Bassin.

After crossing La Plaine des Sables, Le Pas de Bellecombe will offer a panoramic viewpoint overlooking l'enclos Fouqué.

Want to be a change of scene? You will be in the right place in the Pas des Sables and its lunar landscape.

After the meal, the city of the volcano offers a discovery around the volcano and geological activity of the island.

At the end of the day, the city of Saint-Pierre, classified as a city of art and history, will make you discover the colonial past of the island.
